1. Claims 4, 9, 13, 17, 24, 31, 33-43, 47, 48, 50, 52, 53 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 24, 2004.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 8, 10-12, 14-16, 18-23, 25-30, 32, 44-46, 49, 51 and 57-59 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Williams.

Re claim 1, 10, 15, 19, 20, 26, 27, 44, and 57, note that Williams discloses the fixture/holder, (46) for carrying reticle/plate (14), lid/cove/casing/panel (42), seal (44), fluid dispenser (54), clamp/securing means (50), barrier (legs of cover), recess/groove/interface (86) for seal as claimed.

4. Claim 6 stands objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Tsutsui, Hong, Maurer, Hamada et al., Yen et al., Wang,

Krussell et al., Japan'121, Japan'337, European Patent Office '169, note the reticle holding/cleaning means.
